THE AGE OF AEGEAN TEAL

More blue you ask? Well, it is America's favorite color. So, meet "Aegean Teal," Benjamin Moore's 2021 Color of the Year. This sea-inspired shade offers an intriguing combination of blue and green that creates depth and warmth. And it's a shade we've seen expanding its footprint in home furnishings and design. According to the paint and coatings brand, Aegean Teal was chosen for its natural harmony and ability to encourage us to reflect and reset. Sounds perfect for the coming year.
