The Bedroom Centerpiece

Sleeping in style

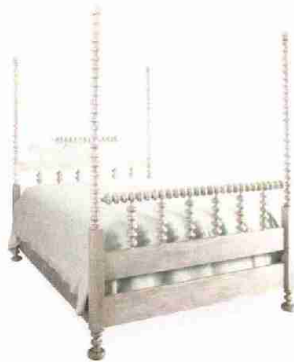

By Linda Burnside, LGB Interiors

Made Goods is stylish with a masterful mix of twisted metal and malachite.

The traditional bedroom has changed dramatically.

In today's design, the bed is the star of the show, and nothing has made that more evident than the new introductions from the April market in High Point. With a play on materials, such as lucite, metal and upholstery, poster beds are back in a big way! 🌟

When you are not quite sure if coastal or cottage is your thing, this poster bed from Mrs. Howard has you covered.

This unassuming and quietly elegant poster bed by Bernhardt is eye-catching. Try pairing with lacquered nightstands for the perfect match.

Caracole introduced the perfect mix of traditional and transitional with this beautiful bed. If you are looking for a bed that suits all styles, this is a winner.

Who said mixing lucite and brass couldn't be traditional? Bernhardt captured the essence of tradition in adding a splash of contemporary. Voilà, a beautiful new poster bed!
