Hosting a dinner party sounds like a great idea in theory—until you realize that you can barely fit four people around your tiny kitchen table. Many of us living in small spaces have long given up on the idea of a dedicated room for entertaining, but even if your open-plan space isn't large enough to accommodate a seated meal for 12, that doesn't mean you can't get creative.

This is where extendable dining tables come in handy: Keep them compact for regular weeknight meals; expand them to their full potential when guests come over. And don't worry, they've had a serious makeover since the clunky furniture your grandmother owned. These nine stylish options can easily make room for all your family and friends.

## If you have an extra-large group of friends...

No one will feel left out at this luxe burl-and-brass table that seats up to 12 people.
