Join us for an illuminating seminar following our Rug Gallery Launch! Topics covering the transitional uses of rugs, from foundational to accessory will be delved into, along with a short history lesson to compare and contrast the transitional uses of rugs today. We'll also get a little technical, discussing rug construction and the different fibers used as well as hot new designs. Robb & Stucky designers Rick Picher and Debbie Candice will take you on this fascinating expedition through all things rugs, and tell you how you can create a story in your living area with... you guessed it, rugs! Light refreshments will be served.
